The Technical University of Denmark (DTU) is one of Europe's leading engineering universities, internationally recognized for excellence in research, education, innovation, and scientific advice. DTU develops and creates value using the natural sciences and technical sciences to benefit society. At DTU, we work closely with industry, public authorities, and international partners, offering a dynamic, interdisciplinary, and inclusive working environment.

This internship is offered under DTU's Global Talent Programme, which provides exclusive opportunities for the most exceptional students from DTU's partner universities worldwide. Only bachelor-level students who have been nominated by their home university are eligible to apply. As a participant at DTU, you will join an ambitious academic setting where

theory meets practice, and students are encouraged to take responsibility, contribute actively, and develop both professionally and personally.

Job Description

DTU Skylab is part of DTU and focuses on supporting researchers and students with innovation and entrepreneurial activities. The center works at the forefront of technology, focusing on competency building and tech and business development, with the overarching goal of bringing knowledge and ideas from DTU to benefit society. You will meet a team of skilled and professional colleagues who are passionate about their work, in a workplace with a positive atmosphere and an informal environment characterized by humor and collaboration.

At DTU, we aim to be data-driven and seek to evaluate our programs' ability to change students' mindsets. We are currently working on **methods to measure entrepreneurial mindset and inclusive mindset**. We would furthermore like to expand it to also measure climate/sustainability mindset in relation to innovation/entrepreneurship.

You will join the Student Innovation Team within the center. The team consists of innovation consultants, project managers and researchers working closely on innovation competency building and creating opportunities for sustainable ideas to foster. As an intern, you will work closely with experienced colleagues who will support your learning and development, while also giving you ownership of your project and the opportunity to contribute your own ideas and skills.

Your tasks will include (but are not limited to):

- Researching existing theories and tools
- Developing an evaluation method to measure climate entrepreneurial mindset
- Testing and validating the developed methodology
- Contributing to scientific documentation
- Participating in team meetings and project discussions
- Collaborating with internal and external stakeholders

The exact tasks and responsibilities will be adjusted based on your background, interests, and the needs of the team.

Approval and qualifications

We are looking for a motivated and curious candidate who:

- Is currently enrolled in a relevant higher education programme at Bachelor's level at a DTU Global Talent Programme partner university. Contact your university if you are

unsure.

- Has experience with or is motivated to research, develop, and test new theories and tools
- Has an interest in environmental and social sustainability as well as innovation and entrepreneurship
- Is analytical, structured, and able to work independently
- Has strong collaboration and communication skills
- Demonstrated proficiency in written and spoken English, documented by a recognized English language test. Minimum required scores are:

- Duolingo English Test (overall 120, speaking 120)

- TOEFL (overall 87, speaking 21)

- IELTS Academic (overall 6.5, speaking 6.5)

What we offer

DTU offers a prestigious internship at DTU Lyngby Campus in the Greater Copenhagen area. The internship provides hands-on research experience in a professional and international academic environment. Interns will work closely with leading researchers, contribute to high-level research projects, and apply their theoretical knowledge to advanced scientific challenges. The internship also offers a supportive and flexible environment designed to foster the development of highly capable and motivated students.

Living in Greater Copenhagen offers an enriching experience for international students. The city is renowned for its high quality of life, dynamic cultural scene, and focus on sustainability. Students will have the opportunity to engage with an international academic community, explore innovative research environments, and enjoy the vibrant lifestyle of Denmark's capital region.

As part of the internship, the student will also become a member of DTU's alumni community network, gaining access to a range of exclusive offers and support, including:

- Administrative and practical support – assistance with residence permits, housing, etc.
- Social and networking framework – social and cultural activities, networking across participating students
- Social activities – introduction week and events throughout the semester
- Networking opportunities – engagement across the cohort of students
- Parallel academic opportunities – coursework on the side and potential DTU supervision

Practical information:

- Internship period: 24 August 2026 – 18 December 2026

- Working hours: 37 hours per week (full-time)
- Location: DTU Lyngby Campus in the Greater Copenhagen area
- Compensation: the internship is unpaid

You can read more about the department here: <https://www.skylab.dtu.dk/>

Application procedure

In order to be considered for this programme, you must be nominated by your home university. Please submit your application including a short, motivated cover letter, and CV. Applications should be sent through DTU Career Hub.

Your complete online application must be submitted no later than 15 April 2026 (23:59 Danish time).

To apply, please open the link "Apply now", fill out the online application form, and attach all your materials in English in PDF files. The files must include:

- A motivated cover letter (max 1 page).
- A CV including information about your education, research and experience, language skills and other skills relevant for the position
- Grade transcripts (in English) including official description of grading scale
- Documentation proving a passed test for one of the above English language tests

We look forward to receiving your application.

Technology for people

DTU develops technology for people. With our international elite research and study programmes, we are helping to create a better world and to solve the global challenges formulated in the UN's 17 Sustainable Development Goals. Hans Christian Ørsted founded DTU in 1829 with a clear mission to develop and create value using science and engineering to benefit society. That mission lives on today. DTU has 13,500 students and 6,000 employees. We work in an international atmosphere and have an inclusive, evolving, and informal working environment. DTU has campuses in all parts of Denmark and in Greenland, and we collaborate with the best universities around the world.
